

Sudhanshu Srivastava

+91-9958163123 | anshusrivastava45@gmail.com | [Medium](#) | [Github](#) | [Linkedin](#)

PROFILE

14+ years of expertise in building high-scale mobile ecosystems. Specialist in modular SDK development and performance optimization for fintech and media platforms. Currently pioneering the integration of Generative and Agentic AI into software engineering workflows to drive 10x developer productivity.

EDUCATION

Kurukshetra University, Kurukshetra

Kurukshetra, India

B.Tech in Computer Sc. & Engg.

2005 – 2009

SKILLS

Mobile Engineering: Swift, SwiftUI, UIKit, Objective-C, Kotlin(Basic), Flutter(Intermediate).

Architecture & Practices: Modular Architecture, MVVM, SDK Design, Codebase Scalability, Performance Optimization, Unit & Integration Testing.

AI / Automation Experience: LLMs, Prompt Engineering, n8n Workflows, API Integrations, Automation Pipelines

Tools: Xcode, Git, CI/CD Pipelines

CERTIFICATIONS

- *iOS Architect* — Essential Developers
- *Product Management with Generative & Agentic AI* — BITSoM + Masai (2026)

EXPERIENCE

PhonePe Pvt. Ltd.

Bengaluru, India

Senior Software Engineer | Mobile

Nov 2021 – Present

- Architected and developed a modular, reusable LoginSDK for the iOS ecosystem to solve fragmented authentication flows, enabling seamless SSO across multiple apps and reducing partner team integration efforts.
- Resolved a critical, high-impact "trending crash" originating in the core module setup flow by identifying an uninitialized module edge case, restoring stability across dozens of dependent pods.
- Drove codebase health and modularization initiatives by enforcing strict coding standards and increasing unit test coverage, resulting in a more maintainable architecture and fewer regressions.
- Spearheaded the integration of Generative AI tools into the mobile SDLC to automate documentation and debugging, significantly reducing manual overhead and improving developer productivity.

BITSoM + Masai

Bengaluru, India

Student | AI Product Strategy & Agentic Systems

Jan 2026 – Present

- Conceptualized and architected a Multi-Agent Travel Planning System to automate end-to-end travel research, booking, and budget optimization, addressing a high-friction user journey.
- Applied Product Management principles to define the problem statement, user personas, and success metrics, bridging the gap between deep technical engineering and consumer-centric product goals.
- Leveraged Agentic AI frameworks to optimize budget-constrained travel itineraries, demonstrating a 10x improvement in planning efficiency compared to manual research.

Hindi Dohe

Personal Project

Nov 2018 – Present

- Spearheaded the end-to-end development and deployment of a curated Hindi poetry platform to the Google Play Store, managing the full product lifecycle from UI/UX design to release management.
- Designed a strategic platform migration from native (Swift/Kotlin) to Flutter to solve for high maintenance overhead, resulting in a single-codebase architecture that increased development velocity.
- Developed a custom "Content Preview Generator" using a graphics-rendering layer to allow users to share stylized poetry images, which drove organic growth and improved social sharing metrics.
- Implemented robust local data persistence for bookmarking and offline access, leveraging advanced state management to maintain a 99.9% crash-free rate across diverse Android OS versions.
- Created a tool to fetch posts from the [HindiDohe FB page](#) and populates the Firebase Database for the app to use.

Times Internet Ltd.

Gurugram, India

Lead Mobile Developer

March 2015 – Oct 2021

- Directed the end-to-end architecture and delivery of *5 high-traffic mobile applications*, overseeing the full SDLC from greenfield design to multi-platform release for millions of users.
- Architected *scalable, modular system designs* for new product launches, ensuring long-term maintainability and reducing future feature integration effort.
- *Managed and mentored* a high-performing team of 8 engineers (iOS + Android), implementing rigorous code review standards and automated testing workflows that improved delivery efficiency and code quality.
- Spearheaded performance optimization and stability initiatives, identifying and resolving critical bottlenecks to achieve a 99.9% crash-free rate across the App Store and Play Store.
- Owned cross-platform release management, navigating complex compliance requirements for both Apple and Google ecosystems to ensure 100% on-time rollouts for major product revamps.
- Aligned technical roadmaps with business objectives by leading large-scale feature rollouts that directly contributed to increased user retention and engagement metrics.
- Recognized with "*Exceeds Expectations*" ratings *twice* for driving high-impact technical contributions and demonstrating exceptional leadership during critical product pivots.
- *Directed an agile mobile engineering team*, introducing structured code reviews and knowledge-sharing sessions that upskilled junior developers and elevated code quality standards.

Techlites Solutions Pvt. Ltd.

Delhi, India

Sr. iOS Developer

March 2014 – March 2015

- Mastered low-level networking to build a SIP-based VoIP engine, optimizing real-time audio buffers for low-latency performance on unreliable networks.
- Architected the tech and worked in product strategies to launch a B2B chat based customer service to create a digital bridge between the buyer and seller.

Xicom Technologies Ltd.

Delhi, India

Sr. iOS Developer

Feb 2011 – March 2014

- Accelerated the go-to-market strategy by spearheading the full-lifecycle development of multiple iOS applications across diverse domains, taking them from conceptual wireframes to successful App Store deployments.
- Minimized technical debt and improved runtime stability through rigorous performance tuning and proactive bug resolution during high-velocity feature rollout cycles.
- *Earned accelerated promotion to Mobile App Team Manager*, scaling responsibilities from individual execution to overseeing the end-to-end product delivery lifecycle for diverse client portfolios in mobile-app domain.

The above statements are true to the best of my knowledge and belief.
